Mero-Schmidlin (UK) PLC Achilles Building Confidence accreditation retained since 2010

We are delighted to announce that along with our BSEN ISO9001 status Mero-Schmidlin (UK) PLC have again passed their Achilles Building Confidence Audit with flying colours

The Achilles Building Confidence accreditation is only awarded after a vigorous compliance procedure examining the whole quality management system.

The Achilles Accreditation was launched in 2007 and holders have to meet very exacting standards across a whole raft of pre-qualification criteria. Buyers are able to enter into procurement arrangements in full confidence that high levels of quality management are being adhered to across the whole company.

Mero-Schmidlin (UK) PLC are based in Camberley having been in business since 1988 and since 2004 have been part of MERO-TSK Group, giving them access to manufacturing services and high tech design capability in Germany and Switzerland to compliment the UK facilities.

The ability to offer a fully inclusive Design - Manufacture and Installation trilogy with a range of innovative solutions that have been tried and tested all over Europe is almost unique in the UK. As pioneers of the space-frame structure and pre-fabricated unitised curtain walling the TSK Group has always been at the cutting edge of building technology. This enables Mero - Schmidlin to offer a multitude of building envelope solutions which are bespoke but are based on the value engineered concepts already used in mainland Europe and in many cases Worldwide.

With the benefit of leading edge design many potential site problems can be identified on the drawing board saving time on site. The Building Envelope Division is further enhanced by the Raised Access Flooring Division which offers a similar range of Design & Install solutions for both interior and exterior applications in commercial projects of all sizes and sectors.

Bespoke Building Envelopes - Glazed Structures - Space Frames - Membrane Structures - Curtain Walling - Raised Access Flooring
